Work Experience

Next Insurance, Palo Alto, CA Actuarial Analyst	Oct 2025 – Present
--	--------------------

- Executed Workers' Compensation (WC) and Commercial Property (CP) base rate filings, ensuring technical accuracy and alignment with state regulatory standards across multiple jurisdictions.
- Automated a multi-line reporting pipeline by integrating SQL and Python with JupyterNotebook to host collaborative monthly reports on Confluence pages.

Next Insurance, Palo Alto, CA Actuarial Intern	Jun 2025 – Oct 2025
---	---------------------

- Developed a "source of truth" dashboard for claims data across all lines of business, visualizing key metrics; became one of the organization's most utilized tools for internal performance tracking.
- Built business monitoring dashboards for Professional Liability (PL) and Inland Marine (IM) lines, integrating policy and claims data to provide comprehensive insights into business mix and performance.
- Addressed regulatory objections using S&P Global/Capital IQ statutory data, extracting relevant exhibits on premiums and losses to support compliance and timely resolution.

Aon Early Careers Actuary Internship Program	Feb 2025 - April 2025
--	-----------------------

- Collaborated on medical vendor evaluations for self-insured plans, utilizing Excel to calculate projected plan-paid claims and total annual fees based on trend factors and actuarial values.
- Synthesized financial analyses into client-facing presentations, providing data-driven recommendations to optimize healthcare vendor selection.

UC Berkeley Projects

- Insurance Corporation Financials - Developed an interactive Excel-based tool to analyze 9,500+ rows of insurance data, utilizing trend factor models to forecast financial outcomes and assess projection accuracy.
- California Fire Map - Designed an interactive R/Shiny application to visualize geospatial wildfire patterns using CAL FIRE API data and shapefiles, enabling multi-year pattern analysis.
